Activity 4: Numbering systems

1. Convert the following decimal numbers into binary:

Decimal number	Binary equivalent
12	00001100
39	00100111
67	01000011
123	01111011
240	11110000

2. What is the lowest and highest decimal number you can make in an octet?

0 and 255

3. Convert the following IP address into binary:

Decimal:	192	168	0	1
Binary octet:	11000000	10101000	0	00000001
	0	0		1

4. Convert the following decimal numbers into hexadecimal:

Decimal number	Hex equivalent
14	E
10	A
25	19
68	44
86	56

5. How many bits are used to make an IPv4 address?
32 Bits

6. How many bits are used to make an IPv6 address?
128 Bits

Activity 1: Diversity and cultural awareness

1. Define each statement. Find examples online from your favourite brands or your workplace.

	Definition	Example
Mission statement		
Vision statement		
Value statement		

2. List the benefits of working in a diverse organisation.

3. Describe your workplace cultural cues.

Activity 2: Communication in the workplace

1. Discuss the advantages and disadvantages of using the following communication methods for service desk tickets in the workplace:

	Advantages	Disadvantages
Phone call		
Instant Messaging		
Email		

2. Respond using clear steps to resolve the customer's issue:

Yeeks IT Team, my computer is not working. I'm unable to go to any websites, Teams is also not working, and I can't access the intranet or shared drive. I've restarted many times but still nothing is being connected. Could you give me a new machine please?

Additional steps/notes

Activity 3: Health and safety

1. List and describe your responsibilities in ensuring health and safety rules are followed in your role.

2. List and describe the electrical items you would consider prone to causing fires in your homes and workplace.

3. What prerequisites would you consider when handling/moving IT equipment in your workplace?

4. List and describe DSE equipment that would assist you in your workplace.

Activity 5: Technical documentation

You are working on the service desk and have been assigned this ticket.
Read through the table below and use the links to create a technical document for the customer.

Activity 6: STARRS

The STARRS method can be adapted to many situations. It is easy to follow and can help to structure your answers in a job interview and your End Point Assessment.

Acronym	Key word	Explanation
S		
T		
A		
R		
R		
S		

Activity 7: Eisenhower Matrix

Write down all your assignments, projects, and tasks (work and personal) that need to be done this week/month/year. Use the template below, or draw your own grid and divide it into four sections.

- Top-left: Important and urgent
- Top-right: Important but not urgent
- Bottom-left: Not important but urgent
- Bottom-right: Not important and not urgent

Now your tasks:
Place each task into the most correct section based on its urgency and importance. If a task feels important but isn't urgent, consider if it can be scheduled for later or delegated to someone else.

Review and action:
1. Identify tasks in the important and urgent box to tackle first.
2. Schedule time for tasks in the important but not urgent box over the next few days.
3. Delegate tasks in the urgent but not important box if possible, or minimise the time spent on them.
4. Consider removing tasks in the not important and not urgent box from your to-do list altogether.

	Urgent	Not Urgent
Important		
Not Important		

Activity 8: Packet Tracer activity

Once Packet Tracer is open, you'll be greeted by the network topology workspace. This is where you'll build and configure your network.

Familiarise yourself with the interface:

- Devices: Look at the various categories of devices you can add to your network, like routers, switches, PCs, and servers.
- Connections: Explore the different types of cables you can use to connect devices.
- Configuration: Click on a device to access its configuration settings. You can set IP addresses, configure routing protocols, and more.

Task summary
1. Provide a cause of failure (IT)
2. Actions (TAR)
3. Verification (R)
4. Summary (RS Overview)
